

Joseph Magyar

AI Automation Specialist

Southern NH | joseph@zeitra.ai | linkedin.com/in/josephmagyar | portfolio.zeitra.ai

SUMMARY

Self-taught automation specialist. I build workflow systems that keep business data clean across tools that don't talk to each other, and turn recurring manual tasks into automations that run on their own. Strong with n8n, LLM integration, and API-connected pipelines. I pick up new tools fast and get them running in production. Looking for an entry-level automation role where I can build, ship, and keep learning on the technical side.

EXPERIENCE

Freelance Automation Consultant | Self-Employed

2025 – Present • Remote

- Build and maintain automated workflow systems for small business clients using n8n, connecting CRMs, email, spreadsheets, and messaging tools.
- Built a 15-workflow bidirectional sync between a real estate client's CRM (GoHighLevel) and their data platform, including a token manager, a central API helper, error handling, and Slack notifications. It fixed record mismatches the team had been reconciling by hand.
- Automated a bulk record-update task the owner ran manually several times a day, removing it from their daily workload.
- Integrate large language models (OpenAI, Claude, DeepSeek) into workflows for lead classification, data extraction, and content generation.
- Build lead-generation pipelines that scrape sources, score leads with AI, and log results to Google Sheets and Notion.
- Deploy internal dashboards and client-facing tools using React and Cloudflare Pages.

Cashier / Sales Associate | Vape Vibes

Jan 2025 – Present • NH

- Run the store's daily operations on my own, from sales and customer service to cash handling and keeping the space clean and stocked.
- Responsible for register accuracy and a positive experience for every customer.

EDUCATION

General Business (Duet Program) | Southern New Hampshire University

Current • Remote
